

# Staged Heating with the Bridge Pro

Flair's hvacOS™ platform brings intelligence and automation to every heating system. By seamlessly transitioning between heating stages based on indoor temperature, outdoor conditions, and user preferences, Flair ensures optimal comfort and maximum efficiency.

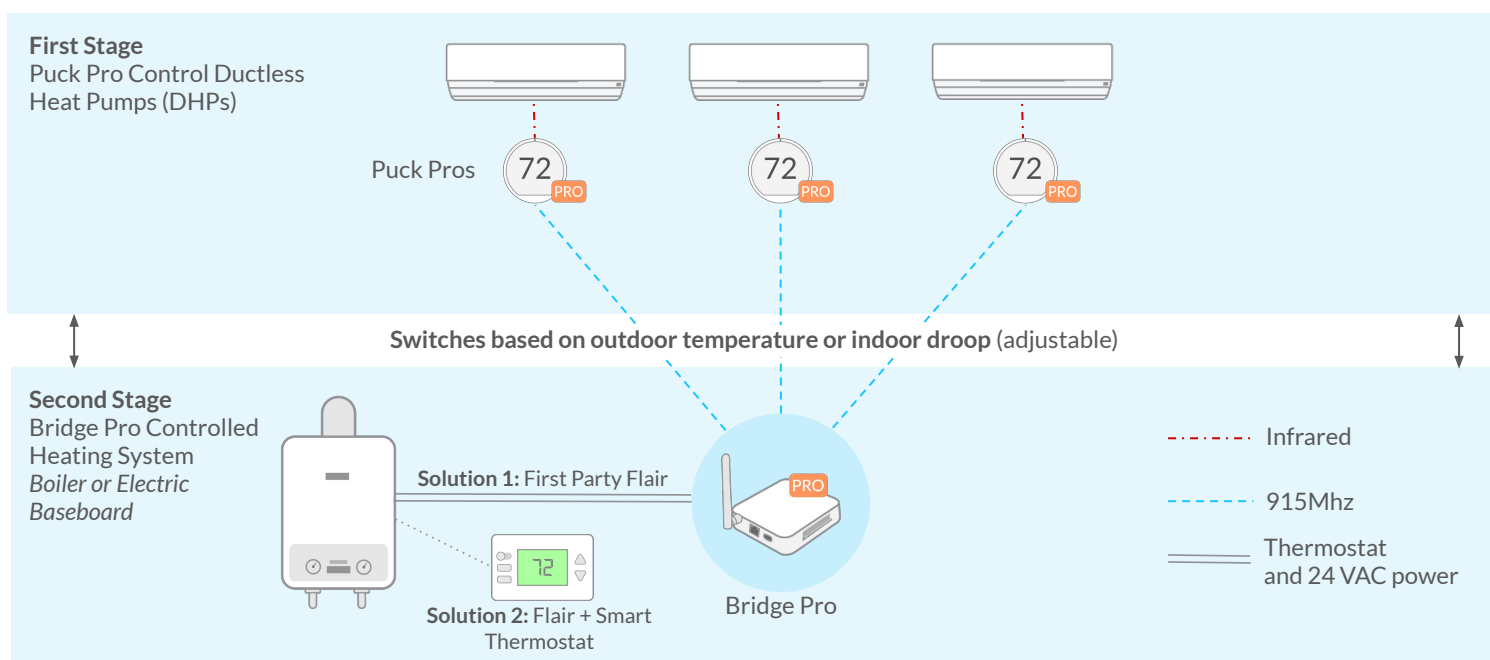

Paired with the **Bridge Pro**—a dedicated, award-winning network hub with the most advanced staged heating control capabilities on the market—Flair Staged Heating solutions deliver a smarter, more efficient way to manage comfort while reducing energy waste, with industry-leading rebate eligibility.

## FEATURES

- **Stage heating** between ductless heat pumps (DHPs) and boilers or electric baseboards.
- **Cost-effective** staged heating configuration options and rebate eligibility.
- **Dry/Wet Contacts** to support up to seven boiler or electric baseboard zones.
- **No C-Wire** pull needed to install boiler or baseboard thermostats.

## STAGED HEATING COMMUNICATION

### Staged Heating Solution Options:

1. Use Puck Pro to control DHP and Bridge Pro to control secondary heat source.
2. Use Puck Pro to control DHP and existing thermostat to control secondary heat source.

## CONNECTIVITY & POWER

- For homes or businesses under 2,500 sq ft, connect the Bridge Pro (Wi-Fi or ethernet).
- For homes or businesses over 2,500 sq ft, use the Flair app to install the Bridge as the networking hub (Wi-Fi or ethernet) and add the Bridge Pro as a device.
- Power using the provided AC power adapter or hardwire (24 VAC).

## REBATE PROGRAMS

Rebates and incentives are available for professional installation of Flair's staged heating/integrated controls solutions.
